

1. Dual speed motor.
 Brushless technology motor coupled to planetary gears in synthetic grease totally enclosed.
 Operates on 36 VAC (supplied from controller)
 Output torque equal to 1 ½ HP.

 Full Load Amps
 110V-7.7
 208V-4.2
 460V-1.9
 575V-1.5
2. Multi volt transformer allows operator to accept all voltages.
3. smooth, quiet operation with programmable acceleration and deceleration. Controls to be dry contact. Programmable obstruction sensing for safety. Electronic self setting limits. NEMA 4 enclosure.
4. #40 roller chain attached to carrier assembly, easy disconnect.
5. Aluminum extruded door track
6. Track rollers and chain disconnect mounted to carrier.
7. Operator Speed- 50" / sec Opening—30" / sec closing
